"SOMEWHERE MY LOVE"

Exquisitely Filigreed and Embossed Miniature Concert Grand Piano Delicate "Window Box" Works Recreate

"LARA'S THEME" FROM DR. ZHIVAGO

And inside is a crystal window so that you can actually see the precision works of the tiny synchronized movement. It's fascinating to watch the winding drum tinkle out the crisp, bell-like melody. COLOR TV MAKE UP DISCOVERY

After: Younger, fresher, more alive

Actual untouched photos

If COUVERT can hide every line and wrinkle of this 46-year-old Indian grandmother... imagine what it can do for you!

Invented to fool the super-critical eye of color TV, a totally new kind of make-up...almost invisible, easy as lipstick to apply, more effective in keeping aging stars young looking than the efforts of the best make-up artists in Hollywood. Forget everything you've ever heard about make-up. Suddenly there's a totally new kind of make-up. A make-up that can make every woman's dream come true, banish lines and wrinkles from sight, dark circles, any and every flaw.

A make-up so feathery light in tone and texture, so perfectly matched to your own complexion, that nobody will ever know you're using it. A make-up designed to be used under blazing color TV lights, so it stays beautiful hour after hour, for as long as 16 hours.

Cameras don't lie...but the eye can be fooled.

Better than words express, you can see for yourself in the dramatic untouched photos what this wonderful new make-up can do. Those aren't just lines and wrinkles, they're furrows deeply etched by years of outdoor living. Now look at the after picture. It proves beyond a shadow of doubt that cameras don't lie, but the eye can be fooled. And now you, too, can create this remarkable illusion...as simply as you put on lipstick.

Two Simple Steps, Three Little Minutes
Couvert comes to you in two small tubes. Each performs its own share of the magic. Together they take no more

than three minutes to apply...together they take 5, 10, even 20 years off your appearance.

Couvert No. 1. A feather-light, skin-tone liquid make-up base that comes in 4 shades, one to exactly match your complexion...

Couvert No. 2. There is nothing else like this. It doesn't mask, coat or cover up. It hides! Like a magic cloak, it makes every single flaw *invisible to the eye*. Lines, wrinkles, circles, enlarged pores, crow's feet.

There is, of course, a sound scientific reason why this miracle takes place. It's called light refraction. Nobody knows you have lines or wrinkles because nobody can see them. But all the explaining in the world won't mean as much to you as the results you see with your own eyes. Therefore, you must see the results spelled out below, or we will return your money with no questions asked.

Three-Way Money Back Guarantee

First, wrinkles, mouth lines, crow's feet, complexion flaws *must disappear* from sight completely...

Second, you must see an immediate glow, a smooth flawlessness, an alluring young radiance that you didn't dare dream you'd ever see again...

Third, this magical illustration must last all day, all night—even under the harshest lights—for as long as 16 hours at a time...

or Elan Corp. International will return your money—no questions asked. So, behold an amazing transformation

in just three minutes. See your face unlined, unwrinkled, visibly smoother, younger-looking than it has been in years—just like the stars you see on colored TV who look so young though you know they're over 35. Return the coupon below right now.

"Someone
to love me!"

It doesn't take much to make a child like Gilbert happy. Sure, he's wearing a torn shirt, frayed trousers, and his little puppy is awfully skinny. THAT doesn't bother him.

But one thing's missing. He needs somebody to love him. It's as necessary as the air he breathes.

No, he can't put this longing into words, but when we visited the little dirt-floor shack where he lives out on the wind-swept Navajo reservation, you could see it in his eyes, his shy smile, the hesitant, gentle touch of his hands.

Have you ever hungered for someone to love you? Then you've felt this child's loneliness. And I know you care!

Will you let me send you FREE information on how you can sponsor a needy child like Gilbert...and through YOUR LOVE genuinely transform his life? I'll send your child's picture, personal history and full details. You may also correspond with your child.

But hurry. There are so many youngsters waiting...and their needs are desperate. Write TODAY!

I'm interested! Please send FREE information about sponsoring a

it's Berry Time

Could there be a better example of good things coming in small packages than the tiny berry? Ask the creatures of the woods—the lumbering bear, graceful bird or adventurous boy. All hunger for the succulent, juicy berry. Your family will thrill too to the bounty of the berry featured in these recipes.

Elderberry Jam

- 2 quarts crushed elderberries
- 6 cups sugar
- $\frac{1}{4}$ cup vinegar

Combine berries, sugar and vinegar. Bring slowly to boiling, stirring occasionally until sugar dissolves. Cook rapidly until thick. As mixture thickens, stir frequently to prevent sticking. Pour, boiling hot, into sterilized jars. Adjust caps. Makes about 3 pints.

Strawberry Trifle

- $\frac{1}{4}$ cup sugar
- 1 tablespoon cornstarch
- $\frac{1}{8}$ teaspoon salt
- 2 cups milk
- 2 egg yolks, slightly beaten
- 1 teaspoon vanilla
- $\frac{1}{2}$ teaspoon grated lemon rind
- 16 double ladyfingers or finger-size slices of day-old sponge or pound cake
- $\frac{1}{3}$ cup fruit jelly or preserves
- 1 cup drained, sweetened fresh strawberries

Midget Meringues, if desired

Combine sugar, cornstarch and salt in saucepan; gradually add milk. Place over very low heat and cook until thickened, stirring constantly. Blend a small amount of custard sauce into egg yolks, and return egg mixture to custard sauce. Remove from

heat at once; cool and add vanilla and lemon rind. Chill. Open ladyfingers; spread centers with jelly or preserves and put together sandwich-style. Arrange ladyfingers over bottom and sides of large glass compote or serving dish. Spread half of fruit over bottom, cover with half of chilled custard sauce. Top with remaining ladyfingers, fruit and custard sauce. Top with Midget Meringues, if desired. Makes 8 to 10 servings.

Midget Meringues

Beat 2 egg whites until foamy. Gradually beat in $\frac{1}{4}$ cup sugar, beating until stiff. Drop by spoonfuls onto brown paper, forming into small peaks. Bake at 300° F. for about 30 minutes; cool on paper. Remove from paper and place on top of trifle. Extra meringues may be stored in a tightly covered container for later use.

Blackberry Cordial

To 2 quarts blackberry juice add 3 cups sugar, and 1 tablespoon each whole cloves, whole allspice, whole cinnamon and whole nutmeg (tied in bag). Simmer 30 minutes. Bring to boiling. Discard spice bag. Pour, boiling hot, into sterilized jars, leaving $\frac{1}{8}$ -inch head space. Adjust caps.

Spiced Berries

- 2½ quarts hard-ripe berries (blueberries, cranberries, currants or elderberries)
- 5 cups sugar
- 2 teaspoons ground cinnamon
- $\frac{1}{2}$ teaspoon ground allspice
- $\frac{1}{2}$ teaspoon ground cloves
- 1 cup vinegar

Cook berries until soft; add remaining ingredients. Cook almost to the jelling point. Stir frequently to prevent sticking. Pour, boiling hot, into sterilized jars, leaving $\frac{1}{8}$ -inch head space. Adjust caps. Makes about 7 half-pints.

Berry Cream Crowdie

- 2 envelopes unflavored gelatin
- dash of salt
- 6 tablespoons sugar
- 1/4 teaspoon mace
- 1 tablespoon lemon rind
- 1 cup heavy cream
- 2 3/4 cups milk
- 1/4 teaspoon vanilla
- whipped cream (if desired)
- fresh or frozen berries

Combine gelatin, salt, sugar, mace and lemon rind in saucepan. Add heavy cream; mix well. Place over low heat, stirring constantly, until gelatin is dissolved. Remove from heat and stir in milk and vanilla. Chill until slightly thickened. Stir gently and then pour into a 1-quart mold. Chill until firm. Unmold and serve with whipped cream and fresh or frozen berries. Makes 8 servings.

Blueberry Treats

Florida Fruit Bowl

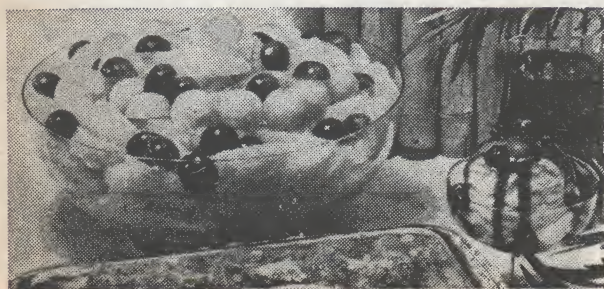

- 4 cups (1 quart) chilled orange and grapefruit sections
- 1 can (6 ounces) frozen orange juice concentrate, thawed, undiluted
- 1/4 cup sugar
- 3 cups fresh fruit in season (melon balls, halved grapes, blueberries, etc.)

Chill sections in 2-quart serving bowl. Add undiluted concentrate. Stir in sugar. Add other fruit; mix lightly and chill for flavors to blend. Makes 8 servings.

Blueberry Ice Cream Sauce

- 3/4 cup sugar
- 2 tablespoons cornstarch
- 1/4 teaspoon salt
- 2/3 cup cold water
- 6 tablespoons (1/2 of a 6-ounce can) frozen orange juice concentrate, thawed, undiluted

Not the formula. Nor the name. Nor the package. Unbeatable. Unique. Proved in the only way that counts. By use.

- 3 tablespoons oil
- ½ teaspoon almond extract
- 2 packages (2 ounces each) whipped topping mix
- 2 pints fresh strawberries, sliced

Stir together flour, sugar, baking powder and salt. Blend together egg, milk, oil and almond extract. Add liquid all at once to flour mixture, stirring until smooth. For each pancake, pour ¼ of batter onto preheated griddle. Spread gently to form 8-inch circle. Bake until small bubbles appear; turn and bake until golden brown. Cool completely on wire rack. Prepare whipped topping according to package directions. Fold in strawberries. Spread ¼ strawberry mixture on bottom pancake. Repeat, alternating layers of pancakes and strawberry mixture. Makes 6 to 8 servings.

Raspberry Hungarian Horns

- 2 egg yolks
- ¼ cup cold water
- 1 cup red raspberry preserves
- ⅓ cup finely chopped almonds
- 1 egg, well beaten
- confectioners' sugar

In a bowl, cut butter into flour until fine particles are formed. Add egg yolks and cold water; stir until dough cleans the bowl. Chill for 1 hour. Divide dough into 28 pieces and roll out each piece, on a lightly floured board, to a 4-inch round. Combine preserves and nuts. Put 1 spoon-

ful of mixture at side of round. Roll up like a jelly roll, pinching ends together. Turn ends down into a crescent shape and brush with beaten egg. Bake on a greased cookie sheet at 350°F. for 15 to 20 minutes. Roll Hungarian Horns in confectioners' sugar. Makes 28.

Berry Jams

Boysenberry, Dewberry, Loganberry, Youngberry, Gooseberry, Blackberry, Blueberry, Raspberry

9 cups crushed berries

6 cups sugar

Combine berries and sugar; bring slowly to boiling, stirring occasionally until sugar dissolves. Cook rapidly to, or almost to, jellying point, depending upon whether a firm or soft jam is desired. As mixture thickens, stir frequently to prevent sticking. Pour, boiling hot, into sterilized jars. Adjust caps. Makes 3 to 4 pints.

NOTE: If seedless jam is preferred, crushed berries may be heated until soft and pressed through a sieve or food mill; then add sugar and proceed.

Capture fresh strawberries in a jam glass for good eating out of season.

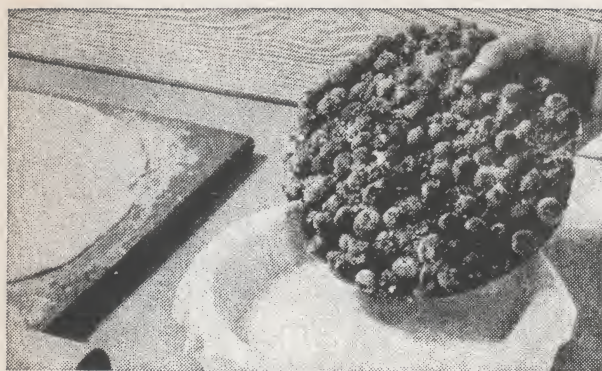

Strawberry Jam

4½ cups prepared fruit (about 2 quarts fully ripe strawberries)

7 cups (3 pounds) sugar

1 box (1¾ ounces) powdered fruit pectin

Thoroughly crush, one layer at a time, about 2 quarts strawberries. Measure 4½ cups into a very large saucepan. Measure sugar and set aside. Mix fruit pectin into fruit in saucepan. Place over high heat and stir until mixture comes to a hard boil. Immediately add all sugar and stir. Bring to a full rolling boil and boil hard 1 minute, stirring constantly. Remove from heat and skim off foam with metal spoon. Then stir and skim for 5 minutes to cool slightly and prevent floating fruit. Ladle quickly into glasses. Cover at once with ⅛ inch hot paraffin.

Frozen Blueberry Pie Filling is pre-shaped for convenient baking.

Frozen Blueberry Pie Filling

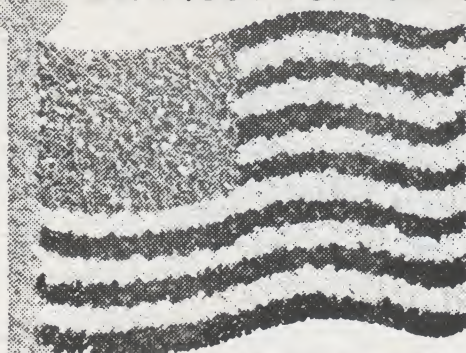

- 4 quarts (16 cups) blueberries
- 3½ cups sugar
- ¾ cup quick-cooking tapioca
- 6 tablespoons lemon juice
- 1 teaspoon salt

To prepare fruit, wash and drain blueberries. Add sugar, tapioca, lemon juice, and salt; mix well. Freeze filling in pie shapes or in four 1-quart containers. To freeze in pie shapes, line four 8-inch pie pans with heavy duty aluminum foil, freezer paper, or several thicknesses of transparent wrap, allowing lining to extend 5 inches beyond rim of pans. Measure 4 cups filling into each pan. Fold extending lining loosely over filling. Freeze until firm. Then seal lining tightly over fillings. Remove wrapped filling from pans. Return to freezer. To freeze in containers, measure 4 cups filling into four 1-quart freezer containers, leaving ½-inch head space. Cover and freeze. Filling may be stored in the freezer up to six months.

To bake a pie, prepare pastry for a 9-inch pie, using favorite recipe. Roll out half of pastry very thin (less than ⅛-inch thick). Line a 9-inch pie pan. Trim pastry at edge. Roll out remaining pastry very thin. Cut several 2-inch slits or a design near center. When using pie-shaped frozen filling, remove wrappings from filling and set frozen block of fruit into pastry-lined pan. (Do not thaw.) When using container of frozen filling, thaw at room temperature just until filling can be separated and spread in pastry-lined pan.

Dot filling with 1 tablespoon butter. Moisten edge of bottom crust. Place top crust over filling. Open slits to permit escape of steam. Trim top crust letting it extend ½ inch over rim. To seal, press top and bottom crusts together on rim; then fold edge of top crust under bottom crust and flute. Bake at 425°F. until syrup boils with heavy bubbles that do not burst—55 to 60 minutes.

Flower and Garden

When is right time of year to transplant peonies and iris? Mrs. L. R., Ky.

Bearded irises usually are divided and reset after midsummer but at least six weeks before first frost so they get firmly re-established before winter. Peonies may be dug, divided and re-set anytime after mid-August; some growers wait until September or October but I favor earlier lifting.

I have a big rhubarb plant that has a great spray of seeds. Can I sow seed and get young plants? O. E. P., Ore.

It is hard on rhubarb to go to seed and often seedling plants are inferior. But seed certainly will grow—I usually let one seed head develop for demonstration and invariably young plants appear in my strawberry row.

Is there a way to treat leaves of *Magnolia grandiflora* for use in Christmas wreaths? They go brittle and dry in a day or so when brought indoors. H. P., Ind.

In late June cut branches, split stems and place in vases filled with half glycerine, half water. Set in bright shade, no wind. As the leaves take up chemical they turn a cordova leather brown and will keep soft and pliable for years. There is no way to preserve the natural green color.

Can you tell me how to kill roots of bamboo plants? Mrs. R. C. A., N. Y.

Bamboo is a woody relative of the grasses; to kill it you have to get the underground stems. To do this, use strong chemicals available in garden store. Keep patch mowed for a couple of years and it will die out.

My amaryllis is almost 3 feet tall but won't bloom. Why? Mrs. O. K., Mo.

An amaryllis must make at least 4 new leaves through summer before it makes a bud the next fall. Over summer move plant to garden, keep it damp, feed every two or three weeks with liquid fertilizer. It will bloom the next winter.

What fast growing trees do you recommend for clay soil? Lombardy poplars seem to be sluggish. L. L. M., N. J.

Almost nothing grows faster (or dies sooner) than a lombardy poplar. I suggest you have soil tested by local County Extension Agent. He will tell you how to treat it so any good tree will grow well and will suggest trees most suitable for your area.

My tulip bulbs have always bloomed beautifully until past year—there were lots of leaves, but no flowers, not even buds. What could cause this? Mrs. H. P., Va.

Did you let foliage mature normally? When it is removed prematurely, no buds form for next year. More likely, bed was overfertilized and, as with most flowers when overfed, tulips made only a lush crop of leaves.

I received some evergreen seeds and planted them. Nearly all came up and grew to about 1½ inches, then fell over and died. How can I have better luck with next seeds I plant? I. R. L., Ill.

Damping-off is problem. Sterilize soil before planting with a chemical such as Dowfume soil fumigant or use a formaldehyde drench (very slow). Or soak newly seeded bed with a special damping-off controlling fungicide such as Pano-Drench or Dexon.

The Unicorn Plant

Robert C. Baur

What is it, animal, bird, or monster from outer space? The dried seed pods of this strange annual are second to none among garden oddities. Actually it is a vegetable although its flowers could compete with the most exotic blooms. The only cultivated genus of the Martyniaceae family, it is officially classified as *Proboscidea jussieui* or *louisianica*. (Proboscidea is Greek and refers to snout-like appearance of seed pods). Most seed catalogs list it as Martynia or Unicorn Plant. It is also known as "Elephant's Tusk," and "Devil's Claw." The 1822 catalog of New York seedsman Grant Thorburn, calls it "Proboscis Flower".

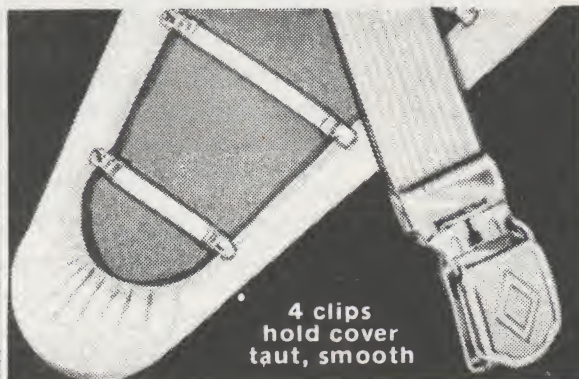

The Unicorn plant in bloom.

Discovered in Louisiana along banks of Mississippi. The Unicorn plant is a native of southeastern United States but may be found growing as far north as southern Indiana and Illinois. Its presence in prairie states indicates that it may have been carried there by buffalo.

Unicorn Plant

(Continued from Page 27)

The curving pronged seed pods are designed to cling to shaggy legs of animals. A related plant is found in Texas and there are several tropical species south of the border.

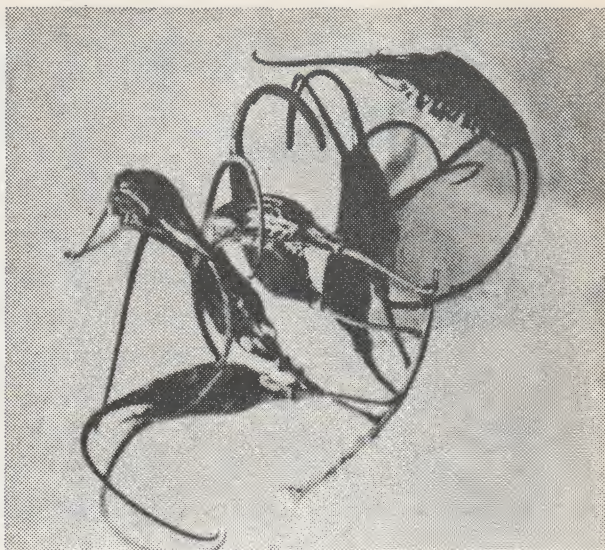

A tender annual, the Unicorn plant will flourish in any sunny garden where tomatoes are grown. Large black seeds, resembling raisins, should be planted when ground is warm and frost free and ¼-inch deep. Seeds should be started indoors in milled sphagnum moss where growing season is short.

Seed pods before splitting.

Give the Unicorn plant room to sprawl for it may grow several feet tall and wide. Don't be concerned with staking and tying, just let plant roam at will. Water generously during dry spells.

The oval leaves and stems are covered with soft wooly hairs and

Seed pods after splitting.

bell-shaped flowers resembling gloxinias cream to violet colored.

Martynia seed pods are a native food plant said to have been eaten by Indians. The tender seed pods are still relished in some localities, being put up like pickling cucumbers with vinegar and spice. However, the main attraction of the Unicorn plant is not in its flowers or food value, but seed pods which split into fantastic shapes. Harvest when pods are firm and ends begin to split. If fruit has not ripened by frost, cut off entire cluster and hang in a cool dry place until pods split open. These dried seed pods need no ornamentation but why not let your imagination go to work with feathers, sequins, and glue?

For three-in-one gardening pleasure, include Martynia in your planting plans for flowers, food, and decorative fruit.

How to Succeed With Wisteria

Gretchen Harshbarger

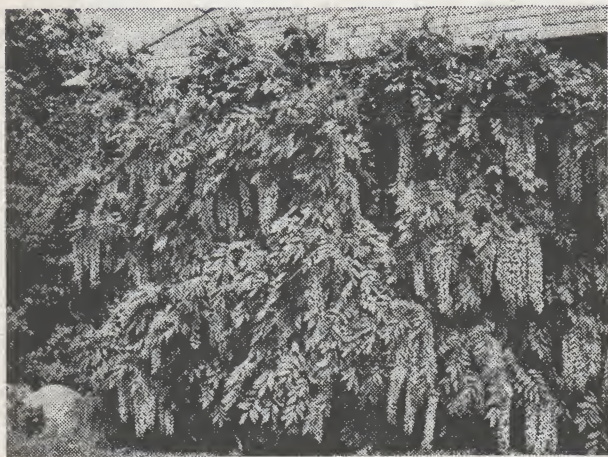

If you are the proud owner of a wisteria vine or "tree" that blooms gorgeously each year, you probably already know most of the keys to success with this spring charmer. But if you are dreaming of starting

a plant, or are the frustrated owner of a vine that stubbornly refuses to bloom, you may find some helps here.

Wisteria is a vigorous, woody, hardy vine that drops its leaves in

winter. It thrives in all but coldest climates. Where winter temperatures drop lower than 10 degrees below zero, it disappoints or fails. Blooms are usually lavender, but there are white and pink varieties. Individual flowers are shaped like pea blossoms and are borne in pendant clusters. They put on their dramatic show about time that tulips and flowering dogwood trees are at their prime and before their own leaves have unfurled.

There are two main kinds, Chinese (*Wistaria sinensis*) and Japanese (*W. floribunda*). Their most conspicuous difference is way in which their flowers open. With the Chinese, all of florets in a cluster open simultaneously. With the Japanese, florets nearest stem open first, and those at tip last. Wisteria seeds and pods are poisonous if eaten.

Planting time and techniques for wisterias are same as for shrubs. Early spring is fine. Those in containers can be set out at any season.

Choose a site with lots of sunshine since wisterias don't bloom well in shade. Bear in mind that vine will climb by twining and eventually become very large and heavy. It will need a strong support which is easiest to prepare now while plant is small.

Good care pays off. While plant

is young, give it plenty of water and feed it with a complete fertilizer each spring. This is period of its life when it should grow rapidly to desired size and space. However, during this state it probably will not produce flowers.

If your vine seems old enough and large enough to bloom, but has not done so, there are some treatments that you can try.

Probably plant is putting too much of its energy into making new growth. You should try to slow it down and help it "mature". One way is to continue ample watering but reduce feeding. Especially avoid applying fertilizers with high nitrogen content that encourages leafy growth.

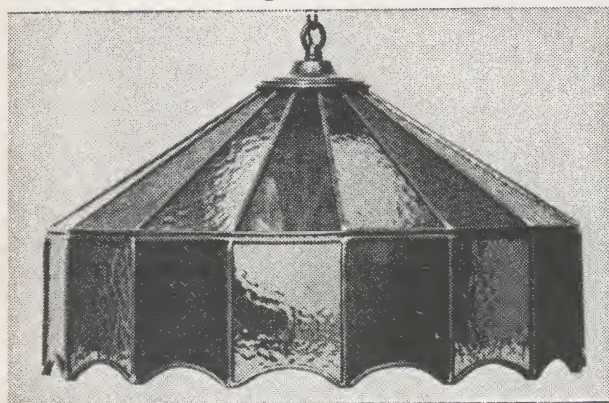

Prune severely each year, carefully and with know-how. This pruning is a little like that done annually on grapes. With wisterias, blossom buds are formed on new leafy shoots that arise from wood (branches) that grew previous season. Pruning is done just after flowers wither. At this time, shorten all new shoots (those with green stems rather than brown) by cutting them back so only 2 or 3 leaves remain. More new shoots will probably emerge and elongate and these also should be cut back. The pruning should stop by August.

Tree wisterias are pruned same way vines are, shortening all new growth continually until August. Otherwise they would become a tangled mess of vines. If you have such an overgrown "tree", you may have to do some major amputating first season to get things back under control. But be brave and you won't regret it. Just be sure not to destroy main trunk and major structural branches.

Good luck! May your wisteria bloom bountifully next spring!

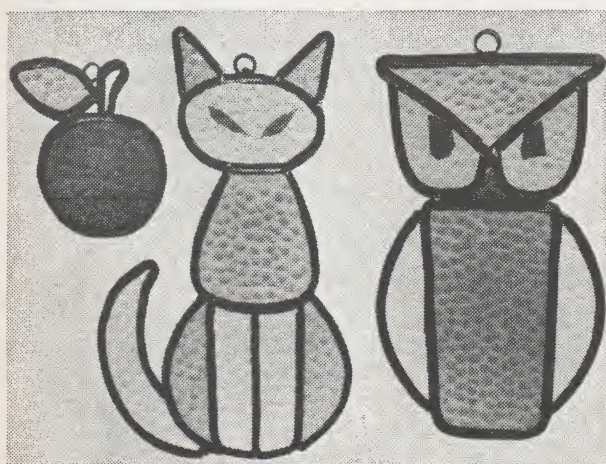

The Art of Cathedral Glass

Jewel hues of stained glass play with capricious light to add warmth, fascination and beauty to a room. You can create an item as small as an ornament or as large as a room divider! Make a chimney for a candle's flickering flame, a window for the sun's rays, or a lamp for an electric bulb's glow.

Lamp in color on front cover.

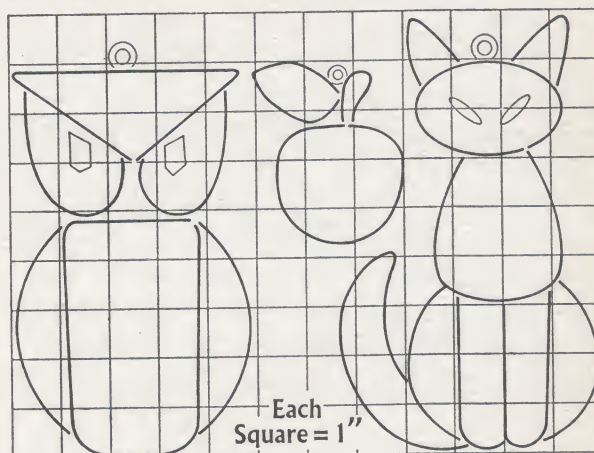

Designs such as owl, cat or apple (as shown in photograph) may be made from small pieces of glass left from a larger project. Draw one-inch squares, enlarge each design to fit in same proportion as given. Heavy lines represent lead comes. Use irregular shapes to form eyes which are glued on. Hangers for each are short pieces of lead came.

Materials needed for stained glass projects are available separately or in kit form through mail order craft supply companies or from local

craft stores. You need sheets of colored glass ("stained", cathedral), lead came, solid solder and oleic acid (flux).

Equipment needed includes piece of plywood to work on (large enough to hold whole design), GOOD quality glass cutter, soldering iron, small knife, hammer, nails, metal ruler, file, tile cutter, goggles and gloves.

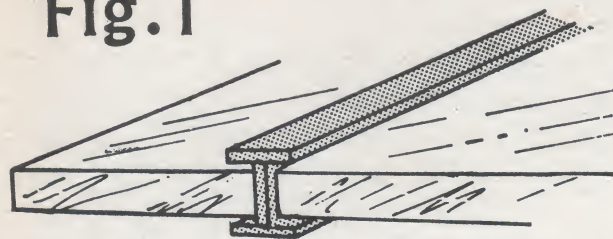

Pattern: Draw pattern or design carefully on paper the actual size of desired finished piece. Keep lines simple. Do not use deep inward curves or angles as these are difficult if not impossible for beginners to cut. Also keep pieces in design a medium size if you are making a round shaped item like a lamp shade as large pieces will not shape gracefully. Too many small pieces make design heavy and dark with lead.

Plan color arrangement before you start cutting.

Transfer design to lightweight cardboard and cut out each piece. Trim 1/32 inch from all sides of pattern. This is to allow space for lead came between each piece. Lead came is I-shaped and each piece of glass fits into slots on either side (figure 1). Making this allowance on glass pieces will make finished item the intended original size.

With tape, secure pattern piece to

Fig. 1

glass along an edge that won't be cut.

Cutting: Whenever working with glass use adequate eye protection and gloves. Make practice cuts on sample of glass you are using in design. If using glass pebbled on one side, make cuts on smooth side. When cutting a straight edge, use a ruler or other rigid edge in addition to pattern. Pull glass cutter toward you on glass with even, steady pressure (figure 2). After glass is scored,

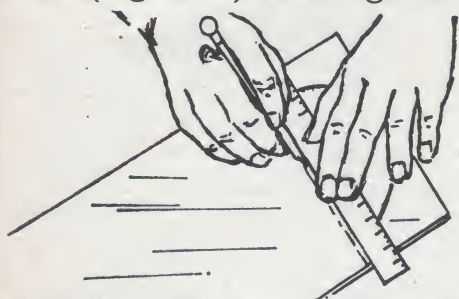

Fig. 2

tap it sharply on opposite side of score with notched side of cutter. Some cutters have a tapping ball to use. Repeated tapings will be necessary and score line will darken as cut deepens until finally, by tapping at one side of scoring, piece can be broken away. If any small burrs are evident, these should be snapped off with tile cutters or filed away.

Assembling: When all pieces are cut, lay them out on plywood in their proper places to recreate original design. Lead comes are used two ways—(1) in short strips as partitions or joinings between small glass pieces and (2) in long lengths around outside edges of an item or between its major sections. Take lead came and fit it on first piece of glass. Cut came with small knife (lead is very soft and cuts and bends

easily) 1/16 inch shorter on each end to allow for came pieces to fit together—(figure 3). If outside edge

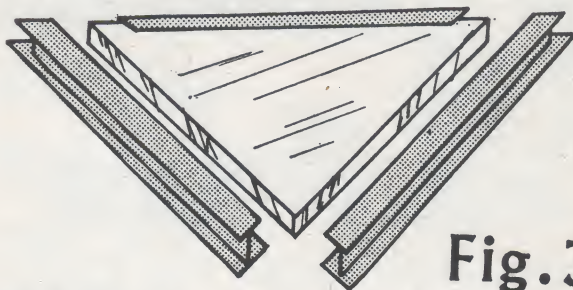

Fig. 3

of design is curved; hammer a nail on outside edge close to came to hold it in position. If outside edge is straight—nail two strips of wood the length and depth of design at right angles on plywood and push came and glass against these edges—(figure 4).

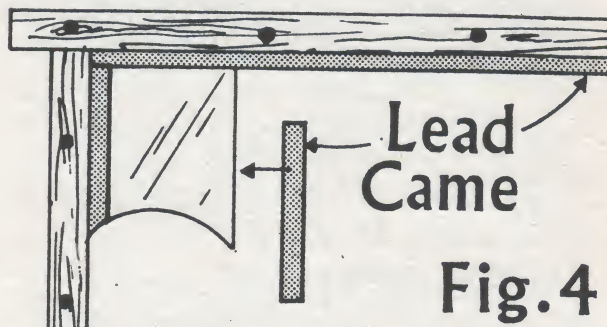

Fig. 4

Soldering: After all pieces of lead have been cut and shaped around edges and between glass (only one piece of lead between two pieces of glass) and pushed together to fit snugly, use an old camel hair brush to apply oleic acid (flux) neatly to each joint. Solder will stay where flux is applied. Consider weight of item being made and make a solder joint of sufficient strength. Solder each joint. When all joints are soldered on one side, gently turn whole piece over and solder each joint on other side.

Ideas on Sewing

The enduring popularity of lovely knit fabrics makes it well worthwhile to master the few techniques of sewing with them.

The fabric's advantage of stretchability should be kept in mind during pattern selections and during each succeeding step because this stretch does dictate certain considerations.

Lightweight jersey knits call for patterns with soft or flowing lines in dresses or blouses; cotton jersey knits work well for pants, shirts or dresses; double knit wool or wool-and-blends are ideal for tailored suits, pants and dresses.

Designs with minimum number of seams are advisable; seams in cross-wise direction of fabric—where stretch is greatest—are to be avoided (raglan sleeves, yokes, circular skirts).

If garment is to be home laundered, pre-wash all materials and items that might shrink.

Pin and cut on large surface; do not allow material to fall and stretch over edge of cutting surface. Use

sharp pins and scissors.

Linings are seldom needed but when used should be constructed separately.

Interfacing should be used to prevent stretch where it is not wanted.

Use stay stitching $\frac{1}{4}$ inch from cut edge around neck, armholes and along shoulder.

On scraps of fabric, make experiments for machine adjustments. Fine needle and loose tension are advisable. Use polyester or cotton-covered polyester thread. Stitches per inch should be 10-12 for polyester knits and 12-15 for wool double knits and jerseys. Slight zigzag stitch adds helpful stretchability.

Install lapped or invisible zippers for knit fabrics. Machine made or bound buttonholes may be used.
